Simplified Network Management
for Businesses, Hospitality or Schools
with Multi-Site Locations.
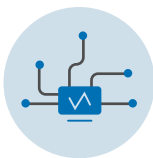

Centralized & Remote Management

Windows Web-based SKYMANAGE PC+ network management software for centralized remote configuration, control and monitoring connected Edimax Pro access points, switches and Wi-Fi clients across multiple sites with multi-tenant capability.

Private-Cloud Virtual Controller

Easily accessible through any standard web browser, SKYMANAGE PC+ software is able to implement on virtual cloud server as a private-cloud* which allows the admin to remotely access and manage the networks from anywhere, anytime.

Built for Businesses and Projects

SKYMANAGE PC+ is ideal for the demands of small-to-medium business environments including offices, hotels, schools, resorts, retailers, shopping malls, community, residential, etc., and system integrator projects.

Optimized Network Performance

Rich features including traffic management, RF performance configuration, spectral analysis, AirTime Fairness, Band Steering, auto channel, captive portal, group setup, group configuration, group firmware upgrade, group restart, secure TLS Protocol and NAT traversal supported, single passcode and splash page for guest login.

Easy, Flexible & Scalable Configuration

Support up to 1000 access points, swtiches and 32 multiple sites with multi-tenant capability, easy configuration wizard and auto-discovery utility for effective and efficient deployment of fully functional networks, also with flexibility and scalability.

Graphical Status, Reports, Tools

Intuitive interface supports graphical dashboard, zone plan and Google Maps for visual overviews of network setup, with easy drag-and-drop features to plan and simulate AP deployment to determine the best coverage areas for your APs.

Lower Total Cost of Ownership (TCO)

The Total Cost of Ownership (TCO) of wireless network deployment with the SKYMANAGE PC+ impresses even the most cost-conscious organizations. Guaranteed to provide unmatched wireless and wired network ROI (Return of Investment).

* Need to be installed in cloud virtual server service such as AWS which is not included with the software.

Access Point

CAP1300
- AC1300 Dual-Band
- 400Mbps (2.4GHz), 867Mbps (5GHz)
- PoE+ Gigabit LAN x 1, Gigabit LAN x 1
- 11ac Wave 2, MU-MIMO

CAP1200
- AC1200 Dual-Band
- 300Mbps (2.4GHz), 867Mbps (5GHz)
- PoE+ Gigabit LAN x 1

CAP300
- N300 Single-Band
- 300Mbps (2.4GHz)
- PoE+ Gigabit LAN x 1

WAP1750
- AC1750 Dual-Band
- 450Mbps (2.4GHz), 1300Mbps (5GHz)
- PoE+ Gigabit LAN x 1, PoE Out Gigabit LAN x 1

IAP1200
- AC1200 Dual-Band
- 300Mbps (2.4GHz), 867Mbps (5GHz)
- PoE+ Gigabit LAN x 1, Gigabit LAN x 1, Phone Line In RJ11 x 1, Pohne Line Out RJ11 x 1

Web Smart Managed Switch

OAP1750
- AC1750 Dural-Band
- 450Mbps (2.4GHz), 1300Mbps (5GHz)
- PoE+ Gigabit LAN x 1

OAP1300
- AC1300 Dural-Band
- 400Mbps (2.4GHz)+ 866Mbps (5GHz)
- PoE+ Gigabit LAN x 1, PoE Out Gigabit LAN x 1
- 11ac Wave 2, MU-MIMO

GS-5424PLC
- 24 x Giga PoE+
- 4 x Giga RJ45/SFP Combo
- Long Range PoE up to 200 Meters
- PoE PD Alive Check
- 450W

GS-5416PLC
- 16 x Giga PoE+
- 4 x Giga RJ45/SFP Combo
- Long Range PoE up to 200 Meters
- PoE PD Alive Check
- 330W

GS-5424G
- 24 x Giga
- 4 x SFP Slot
- Long Range up to 200 Meters
