

AirTracker

Outdoor Location Tracking Solution

Share your location with family and friends

AT-101G
Portable Receiver

AT-101T
Wearable Tracker

The Edimax AirTracker Outdoor Location Tracking Solution is designed so that anyone can build a small-area outdoor locating system. It's fast and easy to use and features LoRa technology for superior performance so teams can share and track precise locations for a range of outdoor activities.

The solution integrates an AT-101G portable outdoor signal receiver with AT-101T wearable outdoor trackers with a detection range of 5km(*). 1 x AT-101G detects up to 50 AT-101T trackers with real-time positioning of each connected tracker on the map. The AirTracker system uses low-power, long range geo-location technology as well as local network signal-tracing to maintain accurate tracking even there is no 3G/4G/LTE network coverage.

* Visual range of 5Km can be detected.

GPS Tracking
for People, Pets or Important Things

Locate everything you care about in real time at a glance. Use your smartphone to track GPS units on people, pets, or vehicles and make sure everything is safe and on schedule.

Activity History
for Onsite Overview & Past Events

Keep track of activity history, record location dates and look back in time with a full location history tab. Perfect for an overview of onsite movements and recent activities.

Location Sharing
Be Closer to Family

Keep everyone in a sharing group of location information via cloud. It's ideal for pet walkers, babysitters, or even cycling teams!

Location Alerts
Assurance Everyone within a Safe Distance

Set up a safe distance and receive push alerts or emails any time your tracker enters or leaves a predefined distance such as around an event.

Supports Off-Line Tracking Mode

The portable AirTracker features off-line tracking mode which helps to keep tracking and recording location as long as the tracking unit is connected to the LoRa signal receiver, even there is no 3G/4G/LTE network coverage.

Advanced Outdoor Tracking Solution Whether in a City or an Outdoor Life

- Rechargeable 1000mAh battery included.
- Low power alert.

Portable LoRa Station

Bluetooth Works with Smartphone

Real-time Tracking & Historical Log

Applications

The Edimax AirTracker Outdoor Location Tracking Solution is ideal for using in camping activities, suburban hiking, large amusement park tour, or setting a safe zone near the house to care the elders, children and pets. You can always grasp the exact whereabouts of loved ones.

Explore Nature

Hiking, camping and exploring nature is often regarded as a tech-free activity. The Edimax AirTracker brings a new level of convenience to track, record and ensure safety on your adventure.

Theme Park Family Travel

Never worry about losing sight of the kids at an amusement park. You can locate everyone with the AirTracker before and during any visits to a crowded place.

Secure Parcels & Bags

Whether you're a solo business traveler or in a small group tour, you can attach an Edimax AirTracker on you or companions' bags so you'll never fear losing anything.

Watch for Kids

Know where your child is and get warnings if they wander away from safe areas. Prevent any potential nightmares before they happen.

For the Elderly or Disabled

Increase safety for the elderly or disabled if they ever get lost or disoriented. The tracking system can make sure anybody is found quickly.

Look After Pets

Attached the Edimax AirTracker to your pet's collar and follow every step. Check its real-time location or explore the tracking history for insights into your pet's health.

* Tracking range of above outdoor activities must not exceed the effective detecting distance of the solution.

* Maximum performance, actual data rates, and coverage will vary depending on network conditions and environmental factors. Product specifications and design are subject to change without notice.
